CMC and Regulatory Project Manager

Angiex, Inc. – LabCentral, Cambridge, MA 02139

Angiex is an innovative science-focused startup developing vascular-targeted biologic therapies for cancer and other diseases. Angiex's lead program is an antibody-drug conjugate therapy for solid cancers. Angiex was launched out of Beth Israel Deaconess Medical Center and Harvard Medical School in 2016, is resident at LabCentral in Cambridge, and is backed by prestigious investors led by Peter Thiel. Angiex founders have previously discovered VEGF-A, been recognized as the world's leading experts in tumor blood vessel biology, developed new methods for per cell mRNA quantification, founded four companies, written a best-selling diet book, and won second prize for best salsa recipe at LabCentral.

JOB DESCRIPTION:

Angiex is seeking a talented, diligent, careful, and conscientious CMC and Regulatory Project Manager to supervise and coordinate the work of contract development and manufacturing organizations (CDMOs), Clinical Research Organizations (CROs), and Regulatory Advisors to advance the preclinical development of Angiex's antibody-drug conjugates. You will help plan and manage projects; develop project plans and milestones; participate in site visits and selection of CDMOs; ensure optimal reporting, technical communications, and tech transfer; ensure compliance with regulatory requirements; anticipate problems and act proactively to maintain or beat project schedules; assist in development of regulatory strategies and submissions; proactively identify and mitigate risks.

RESPONSIBILITIES:

- Develop tools and mechanisms for monitoring project progress, problem solving within project teams, and driving successful execution of projects
- Support knowledge management for programs including process and method tech transfer and validation
- Identify and analyze project risks and guide project teams to develop appropriate mitigation strategies
- Adjust project plans in response to progress or unanticipated delays
- Coordinate with clinical research organizations to ensure that preclinical and clinical supply needs are met
- Support regulatory filings
- Manage external CDMO partner change orders by identifying need, identifying sources of information and obtaining internal and external approvals.
- Be talented enough to rapidly master tasks you've never done before, cooperative and communicative enough to make a great team even stronger, dedicated enough to accomplish your mission no matter the obstacles, honest enough to say when you can't, and cheerful enough to enjoy to the fullest the process of bringing great drugs to market.
- Cure cancer.

Requirements:

- At least 5 years of relevant biopharmaceutical industry experience seeing multiple CMC projects progress from inception to completion. At least 2 years of Project Management experience at a fast-paced biotherapeutics company.
- Track record of successfully driving, managing and implementing preclinical research and development projects, including experience working with leading CDMOs for biologic drugs and experience preparing regulatory submissions and data packages
- Previous experience in analytical development, process development, and manufacture of biologics
- Highly self-motivated, talented, versatile, with excellent oral and written communication skills, strong organizational skills and high conscientiousness, and a willingness to hold others accountable.
- Ability to work independently yet team-oriented; capable of building strong relationships with peers within the firm and partners outside the firm; a preference for working in a highly communicative and cooperative team; honesty, transparency, humility, integrity.

Application: Please email cover letter and CV to careers@angiex.com.

Benefits: Angiex provides a highly competitive package of benefits including a broad selection of medical, dental, and vision plans, free parking in an adjacent garage or a free MBTA pass, and free membership at [MIT Recreation](#).

Statement:

Angiex is an equal employment opportunity employer and does not discriminate against any applicant because of race, creed, color, age, national origin, ancestry, religion, gender, sexual orientation, disability, genetic information, veteran status, military status, application for military service or any other class protected by state or federal law.
