

RIPARIAN

PHARMACEUTICALS

Be a SCIENTIST at Riparian

OUR MISSION

Riparian is an early stage biotechnology company discovering therapeutics to improve vascular health. We hope to translate novel biology of the blood vessel wall into new therapies for some of the most prevalent human diseases.

THE POSITION

We are looking for a Scientist to be a core member of our team. In this unique opportunity to join the early stages of a startup, you would help shape culture and drive scientific innovation at Riparian, combining frontier biology experimentation with first-in-class small molecule drug discovery.

THE IDEAL CANDIDATE

Our ideal teammate is enthusiastic, energetic, eager to be in a fast-paced startup and has impeccable character. We are looking for a scientist with a PhD or 4+ years of industry experience with a background in cell biology, interrogating signaling pathways, and experience with cell-based assays, ex vivo studies, and RNA/protein expression and modulation techniques. Experience in vascular biology, postdoctoral studies or industry would be ideal. Success will require creativity, curiosity, flexibility, initiative-taking, meticulousness and close collaboration for our multidisciplinary experimental approaches.

TO APPLY

To apply, please send cover letter and resume to jobs@riparianpharma.com.

Only applicants currently eligible to work in the U.S. will be considered.

We are not accepting unsolicited resumes from agencies and will not pay any associated fees.
