Research Scientist/ Senior Research Scientist: Immunology Pharmacology

Obsidian Therapeutics, a newly formed Atlas Venture company, is developing a new class of cell and gene therapies that employ precise exogenous control of transgene expression for improved safety and efficacy. We are looking for a highly talented, flexible, collaborative, dynamic immunologist to be a key driver of our preclinical pharmacology efforts.

This role is a unique opportunity to be an early partner and a scientific leader in well-funded startup with blue chip investors, field-leading founders and advisors, and a highly experienced startup team. You will help us build a dynamic, passionate, collaborative, transparent and successful organization focused on delivering transformative therapies in oncology and other areas of greatest clinical need. Located in an energetic environment in the heart of Kendall Square, Obsidian is an equal opportunity employer offering a competitive salary and benefits package.

Primary responsibilities:

1. Lead immunology and immuno-oncology preclinical pharmacology studies
2. Isolation and characterization of T cells and T-cell subsets, ex-vivo T-cell manipulation
3. Adoptive transfer of T-cells, in vivo characterization of modified T-cells, biomarker development and pharmacodynamic characterization
4. Develop and implement Immuno-oncology preclinical efficacy models internally and at CROs
5. Experience with functional T-cell assay development using multi-color flow cytometry, Luminex, ELISA / ELISPOT and cellular and molecular biology methods such as quantitative ePCR, western blotting etc.
6. Manage collaborations with CROs and other external collaborators
7. Independently design experiments, meticulously execute on bench work, analyze data, troubleshoot and communicate findings

Required Qualifications and skills:

1. BS/MS with 5+ yrs experience or PhD with 2+ yrs experience in immunology / immuno-oncology in biotech/pharma setting
2. Excellent understanding and passion for immunology and immuno-oncology
3. Demonstrated expertise in ex-vivo and in vivo immunology studies and functional T-cell assays, experience with in vivo immuno-oncology models a strong plus
4. Strong analytical, troubleshooting and excellent communication skills, highly organized with flawless record keeping and multi-tasking abilities
5. Highly collaborative working style and ability to adapt in a fast paced, rapidly developing environment
6. Authorized to work in the US at the time of application
