**Satellite Biosciences** is pioneering the development and implementation of proprietary, off-the-shelf, implantable satellite organs as living therapeutic solutions that can transform the lives of millions of patients who suffer from serious diseases. Building on 25 years of work in award-winning labs at top academic institutions, the platform is supported by a strong IP portfolio and is backed by a top tier syndicate, led by Polaris Partners. This role is a unique opportunity to join an early-stage, well-funded Biotech startup.

The **Senior Manager/Associate Director of Strategy**, will report to the Chief Strategy Officer, and serve as a key business partner and be immersed in strategic and operational elements of the company, as well as take a lead role in supporting large projects within the business, having insight and access to the corporate strategy and direction in the US and globally. Specifically, in partnership with Satellite's leadership, this role will have the opportunity to focus on formulating and implementing strategies in support of accessing more patients with our therapeutic approach. This will include developing a deep understanding of disease areas and indications of interest by engaging with key opinion leaders and clinicians, studying the treatment paradigms and therapeutic pipelines, and drafting potential target product profiles. The successful candidate will also work closely with the team to build a comprehensive and updated map of business development opportunities, both conventional and unconventional ones, and be an active participant in the emerging external innovation effort.

We are searching for a driven, enthusiastic and self-motivated individual who is comfortable multitasking and working independently on various initiatives. This individual will join a dynamic, rapidly growing, and highly collaborative team in an exciting startup.

**Key Responsibilities:** The successful candidate will work both independently and as part of a collaborative team to:

- Map the landscape of relevant technologies and companies, and their relative advantages and limitations
- Develop a deep understanding of disease areas and indications of interest via primary resources (engaging with key opinion leaders, Satellite advisors, clinicians, patient advocacy group leaders, etc.) and secondary resources
- Synthesize findings and draw out strategic implications for Satellite
- Engage in collaborative discussions to define strategic options for Satellite
- Prepare critical strategy documents for Satellite board meetings and investor meetings
