

**Dyno Therapeutics is recruiting!**

Contact: [jobs@dynotx.com](mailto:jobs@dynotx.com), Location: Cambridge, MA

Come join our team, and together we'll realize the true potential of gene therapy!

### **Who we are**

Dyno Therapeutics is a Cambridge based, VC-backed biotech startup that uses next-gen DNA technologies and machine learning to engineer Adeno-associated Virus (AAV) capsids for the effective delivery of gene therapies.

### **What we offer you**

As a member of our quickly growing company, you'll help us shape Dyno into a startup that takes its scientific mission seriously and provides a positive and supportive workplace environment. Dyno will have the opportunity to benefit from your insight, skills, and talent while enriching your professional and scientific experience as we grow the company together.

### **Our mission**

At Dyno, we are expanding the boundaries of gene therapy. AAV capsids are currently the vector of choice for gene therapy, but they are only a starting point in the gene therapy revolution. Dyno aims to dramatically extend the reach of gene therapy by overcoming the limitations of existing AAV capsids, allowing more therapies to reach the clinic. Doing so will enable treatment for millions of patients with currently incurable, often disabling and deadly diseases.

### **How?**

Dyno's groundbreaking engineering pipeline harnesses advances in DNA library synthesis, high-throughput sequencing, and machine learning to generate transformative gene therapy vectors. We target the major barriers that separate AAV gene therapy research from real-world therapies, including delivery efficiency, tissue and cell-type specificity, immune evasion, and more. Our vectors will accelerate the transition of gene therapies from the lab to the clinic for the benefit of patients worldwide.

### **Where?**

Dyno is located near Kendall Square in Cambridge. Situated within the dynamic LabCentral community, Dyno is working alongside other startups that are also creating the future of biomedicine.

### **Available position**

[Software Engineer – AAV engineering; Data Team](#)

### **General role**

The data science team is at the heart of Dyno's platform, and your work as a part of this team can have a major impact on the future of gene therapy. Our team's responsibilities spans from analyzing biological data in a statistically rigorous manner to building machine learning models, developing computational optimization approaches, and contributing to experimental design of high-throughput viral libraries. A

successful candidate will be taking a leading role in the design and architecture of our end-to-end data pipeline, creating strong software quality standards, and collaborating closely with data scientists to streamline the process of running machine learning models on our data effectively.

As an early member of our team, you will have the opportunity to help craft our approach, shape our culture, and positively impact people's lives. You will work closely with a group of talented, driven, and fun scientists. We are located in Lab Central in a dynamic community of biotech startups. The guideline below should give you a rough picture of who we are looking for, but depending on your background, you may bring different qualities to our team. Don't hesitate to write to us if you think you are a good fit. We offer competitive benefits.

### **Basic qualifications**

BS, MS, or Ph.D. in Computer Science (or related fields) or equivalent experience.

- Expertise in Python.
- Understanding of data warehousing architectures.
- Ability to communicate and collaborate with scientists of different backgrounds.

### **Preferred qualifications**

- 1+ years work experience in software development, including databases, and distributed computing.
- Experience designing or maintaining complex software platforms.
- Proficiency with common data infrastructure tools (Hadoop, Hive, Spark, MySQL, etc.).
- Experience with at least one machine learning library (such as Tensorflow or pyTorch) as well as the ability to run them on large datasets in a distributed manner.
- Internship or work experience at a leading software company.

We are an equal opportunity employer and value diversity at our company. We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.

Job Type: Full-time
