

## Senior Research Associate, Translational

### About Revitope Oncology, Inc.

Revitope Oncology, Inc. is a privately funded cancer therapeutics company with a focus on innovative tumor-specific antibody based biotherapeutics. Based in Cambridge, MA, the company has conceived, engineered, patented and pre-clinically tested novel classes of bispecific antibody therapeutics designed to enable tumor-specific immunotherapy with improved therapeutic efficacy and safety. For more information, please visit [www.revitope.com](http://www.revitope.com).

### The Role

We are looking for a highly motivated and enthusiastic cell biologist to join our Biology team. This individual will be responsible for conducting in vitro assays in multiple assay formats and working collaboratively to adapt preclinical assays to suitable clinical formats. This is an exciting opportunity to contribute to the development of the next generation of T cell redirection biologics in a fast-paced, rapidly growing biotech startup with a bold vision.

### Key Responsibilities:

- Mammalian cell culture of multiple tumor cell lines
- Conduct various in vitro assays in multiple assay formats
- Document, analyze and interpret experiments
- Present results and conclusions clearly and succinctly to the team
- Maintain clear, accurate written records of laboratory procedures, results and conclusions

### Required Qualifications:

- BS/MS in biological sciences or a related discipline with 5+ years research experience in biotech/pharma
- Hands on experience with mammalian cell culture and cellular activity assays
- Experience with molecular techniques including Western blot and protein measurement platforms (e.g., ELISA, MSD)
- Experience with flow cytometry, immunohistochemistry and immunofluorescence techniques and/or IHC/IF
- Proficiency in data analysis (e.g., Graphpad Prism, FlowJo)
- Attention to detail, documentation of data, and effectively communicate results
- Enjoys working in a fast-paced, team-oriented, multidisciplinary environment
- Experience with biologics drug discovery is a plus
- Willingness to learn additional skills and technologies

### What We Offer

This is a unique opportunity to join a team of exceptional scientists and industry veterans at a fast-paced, rapidly growing biotech startup with a bold vision. As an early employee, you will have a direct influence on the science, opportunities to gain new skills and be joining an ambitious, innovative, and collaborative team. If you are interested in learning more about this position, please send your CV or resume to [careers@revitope.com](mailto:careers@revitope.com).

Revitope is deeply committed to diversity, equality, and inclusion in all of its practices, especially when it comes to growing our team. We hope to continue to build a company whose culture promotes inclusion and embraces how rewarding it is to work with individuals from all walks of life.
